Cleaning and maintenance advice

Before grouting

A pre grout protector Fila PRW200 is advised to protect the tiles; this is a temporary seal that when cleaning the grout will wash off.

Initial washing

The initial washing is fundamental for good treatment results. The initial washing is aimed at removing any laying residues and building grime.

Product: Cloth

Impregnating

It is also recommended to seal the body of the tiles with Fila MP90.

Routine maintenance

The aim of the routine maintenance is to remove dirt and scuff marks. Must be carried out regularly.

Product: Cleaner Pro

Please see www.filasolutions.com for methods of use, dilution and coverage.
