Technical data sheet - ISO 10545 average values

3	Water absorption	Conforms
6	Deep abrasion resistance	Conforms
8	Thermal expansion coefficient	≤9 MK-1
9	Thermal shock resistance	Resistant
12	Frost resistance	Resistant
13	Resistance to low concentrations Resistance to high concentrations Resistance to domestic chemicals and additives for swimming pools	ULA to ULB UHA to UHB UA
14	Stain resistance	Class 5
	Pendulum test (Shod) - Slider 96 Wet	Matt ≥36 PTV

LRV and PTV values can vary batch to batch, please contact for advice.
Swatch colours may vary, samples should be requested.

Sustainability information

The production system and management choices adopted allow us to keep consumption of natural resources and pollution down to a minimum.

The manufacturing of the atomized paste (base) and powdered enamels (colour), is done by dry pressing without the use of water, creating a more durable quality product and avoiding the production of wastewater discharge.

The firing is done using a modern electric kiln, powered by green energy produced from renewable sources (wind turbines and solar power) by one of the group's companies, avoiding the use of fossil fuels and atmospheric emissions.

All scrap and waste are collected separately and sent for recycling.

Made within EU.

Cleaning and maintenance advice

Initial washing

The initial washing is fundamental for good treatment results. The initial washing is aimed at removing any laying residues and building grime.

Product: Deterdek Pro

Routine maintenance

The aim of the routine maintenance is to remove dirt and scuff marks. Must be carried out regularly.

Product: Cleaner Pro

Special maintenance

Special maintenance is carried out in case of very stubborn dirt, when the routine maintenance is not enough to restore the original look of the surface.

Product: PS/87 Pro

Please see www.filasolutions.com for methods of use, dilution and coverage.
