## CLEANING + MAINTENANCE ADVICE

### INITIAL WASHING

The initial washing is fundamental for good treatment results. The initial washing is aimed at removing any laying residues and building grime.

Equipment	Cloth
Procedure	<ul style="list-style-type: none"><li>• Clean off cement stains from grouting and other building work, which once hardened, will not be removed during any normal cleaning procedure.</li><li>• Clean wall tiling with a dry cloth when joints are hard.</li></ul>

### ROUTINE MAINTENANCE

The aim of the routine maintenance is to remove dirt and scuff marks. Must be carried out regularly.

Product	Filacleaner (Diluted 1:50 in warm water)
Equipment	Cloth
Procedure	<ul style="list-style-type: none"><li>• Remove dust with a dry cloth</li><li>• Wash with FilaCleaner using a cloth that should be soaked often in the solution and wrung out well</li></ul>

### \* IMPORTANT INFORMATION - METALLIC TILES

The special metallic glaze of these tiles is particularly acid-sensitive. Anti-limescale products should not be used for ordinary maintenance. We recommend to use a natural cleaner such as Fila Cleaner.

**Do not use aggressive cleaning products such as bleach or ammonia.**

Complaints due to a laying or fixing mistakes will not be accepted.
