## CLEANING + MAINTENANCE ADVICE

### INITIAL WASHING

The initial washing is fundamental for good treatment results. The initial washing is aimed at removing any laying residues and building grime.

| Equipment | Cloth |
|---|---|
| Procedure | • Clean off cement stains from grouting and other building work, which once hardened, will not be removed during any normal cleaning procedure.<br>• Clean wall tiling with a dry cloth when joints are hard. |

### ROUTINE MAINTENANCE

The aim of the routine maintenance is to remove dirt and scuff marks. Must be carried out regularly.

| Product | Filacleaner (Diluted 1:50 in warm water) |
|---|---|
| Equipment | Cloth |
| Procedure | • Remove dust with a dry cloth<br>• Wash with FilaCleaner using a cloth that should be soaked often in the solution and wrung out well |
