Slip resistance Pendulum		Wet ≥ 36PTV Low slip potential ●
Slip resistance	DIN 51130	R10/B

INSTALLATION CARE AND CLEANING & MAINTENANCE ADVICE

SETTING MATERIALS (ADHESIVES / GLUES)

Adhesives should be specifically selected for installing porcelain tiles that have very low water absorption. These adhesives are commonly a combination of cement based material with polymer / latex additives. Through use of these an increased bonding action when compared to standard tile adhesive products can be achieved.

GROUT JOINTS

According to the performance required, grouts can be selected either as epoxy or cementitious based types. Before using cementitious dark grouts on light tile colors, it is advisable to apply a pre-treatment protection on the tiles surface. Even with surface protection, we do not recommend the use of cementitious black/charcoal grouts.

INITIAL WASHING

The initial washing is fundamental for good treatment results. The initial washing is aimed at removing any laying residues and building grime. For these Design Two tiles it is very important to completely remove any cement / grout residues after installation. Any cement or grout residues (a film of porous materials left on tiles surface) tend to trap dirt. Therefore, a total removal of cement / grout residues is crucial for a good installation and easy maintenance.

Product	Deterdek (1:5 diluted in water)
Coverage	Deterdek (5 l per 100m ²)
Equipment	Single-disc professional floor cleaner, liquid vacuum cleaner and cloth
Procedure	- After the floor is swept and soaked with water, spread the diluted Deterdek onto the floor. - Then scour with single-disc professional cleaner - Vacuum the residue, rinse the floor well and then mop with a liquid vacuum cleaner or a cloth.

LRV and PTV values can vary batch to batch, please contact for advice.

Swatch colours may vary, samples should be requested.

Find us on:    

ROUTINE MAINTENANCE

The aim of the routine maintenance is to remove dirt and scuff marks. Must be carried out regularly.

Product	Filacleaner (Diluted 1:50 in warm water)
Equipment	Cloth or mop (For large areas the use of a cleaning machine is recommended)
Procedure	• Dilute Filacleaner in warm water • Wipe a cloth wet with the solution over the floor • Rinse the floor in case of concentrated solutions of Filacleaner

SPECIAL MAINTENANCE

Special maintenance is carried out in case of very stubborn dirt, when the routine maintenance is not enough to restore the original look of the surface.

Product	Fila PS/87 (1:5 diluted in water)
Coverage	5 l per 100m2 (when diluted 1:5)
Procedure	• Dilute Fila PS/87 in 1:5 in water • Apply to the floor previously soaked with water and leave for a few minutes • Scrub with a single disc professional cleaner • Mop up residue with a liquid vacuum cleaner or cloth
