## Technical data sheet - ISO 10545 average values

3	Water absorption	<b>Conforms</b>
4	Bending strength	<b>19N/mm<sup>2</sup></b>
8	Linear thermal expansion	<b>&lt;8.5N/mm<sup>2</sup></b>
11	Crazing resistance	<b>Conforms</b>
14	Stain resistance	<b>Class 5</b>

## Sustainability information

## Cleaning and maintenance advice

### Initial washing

The initial washing is fundamental for good treatment results. The initial washing is aimed at removing any laying residues and building grime.

Product: Cloth

### Routine maintenance

The aim of the routine maintenance is to remove dirt and scuff marks. Must be carried out regularly.

Product: Cleaner Pro

Please see [www.filasolutions.com](http://www.filasolutions.com) for methods of use, dilution and coverage.

### \* Important information - metallic tiles

The special metallic glaze of these tiles is particularly acid-sensitive. Anti-limescale products should not be used for ordinary maintenance. We recommend to use a natural cleaner such as Cleaner Pro. Do not use aggressive cleaning products such as bleach or ammonia.

Complaints due to a laying or fixing mistakes will not be accepted.
