CORETONE™

ADVANCED PORCELAIN TECHNOLOGY

## Grestec Coretone: *Full-Body Integration*

Grestec Coretone represents the absolute pinnacle of porcelain technology. By incorporating bespoke mineral components tailored to each collection—including contrasting chunks of porcelain and varying degrees of pigmentation through the depth of the material—it becomes possible to achieve the highest levels of durability as the material fuses, while making the effect authentic to the material origins from all angles.

### The Coretone Advantage

**True-to-Life Character:** The integration of contrasting porcelain chunks ensures an organic aesthetic that remains faithful to its material origins from every viewpoint.

**Integral Design:** Aesthetic elements are fused through the entire body of the tile rather than being surface-applied.

**Structural Integrity:** This deep-body fusion creates a high-density, wear-resistant material engineered specifically for the rigors of high-traffic and demanding environments.

**Seamless Fabrication:** Because the internal body perfectly matches the surface, this technology is the definitive choice for sophisticated details like mitred joints, profiled stairs, and visible edges.

## Cleaning and maintenance advice

### Initial washing

The initial washing is fundamental for good treatment results. The initial washing is aimed at removing any laying residues and building grime.

Product: Deterdek Pro

### Routine maintenance

The aim of the routine maintenance is to remove dirt and scuff marks. Must be carried out regularly.

Product: Cleaner Pro

### Special maintenance

Special maintenance is carried out in case of very stubborn dirt, when the routine maintenance is not enough to restore the original look of the surface.

Product: PS/87 Pro

Please see [www.filasolutions.com](http://www.filasolutions.com) for methods of use, dilution and coverage.

## LRVs and PTVs

*LRV and PTV values may vary between batches; please contact us for guidance. Swatch colours may differ from final production, samples are recommended.*
